

PRIMER GRIP

Bituminous Primer Complies to ASTM D 41

DESCRIPTION

PRIMER GRIP is a cold applied bituminous primer formulated with oxidized bitumen mixed with polymers and additives, complies with appropriate standard.

USES

PRIMER GRIP ASTM D 41 is suitable to use before the application of ROOFGrip modified bituminous membranes or asphalt coatings for roofing, waterproofing and damp proofing above and below ground level. It penetrates into the concrete and other surface to help binding the dust particles, to enhance bonding the membrane and bitumen coating to concrete. It also protects metals exposed to weather.

APPLICATION

Surface Preparation: All surfaces must be thoroughly cleaned, free from dust, debris and loose concrete, Oil, grease and foreign matter. Concrete surface must be free from sharp protrusions and holes should be filled and angle fillet (Gola) to be prepared and concrete must be thoroughly dried before the application of primer.

PRIMER GRIP can be applied at the rate of 0.2-0.3 lit/m² by brush, roller or squeegee. It should be left to dry naturally. The consumption of primer depends on the porosity and smoothness of the concrete. The priming coat can be prepared by diluting 20-30% clear compatible water in Primer Grip.

STORAGE

Store in dry and shaded area in open space, the container lid should be kept close always after use.

PACKING

PRIMER GRIP is available in 15Kg Pail and 200 Kg drum.

TECHNICAL DATA

PROPERTIES	VALUE
Density at 25°C Kg/Liter	(1.02-1.06)
Drying time	3 Hours approximate
Solubility in trichloroethylene	99% (min)
Residue Specs	Polymerized Bitumen
